

# Possible Production Layout

~the same ratio as detector,  
placed to maximize yield.

(4-1R, & 4B added)

Inner circle has radius ~90%  
of full wafer radius

Module	#	# on 1/2 planes	# of wafers for 60 1/2 planes
4R	1	2	120
5R	3	9	180
6R	3	7	140
8R	2	5	150

Dave,  
I would place all three 6R type sensors together to facilitate later dicing. I don't think that doing so would risk yield appreciably. Probably not at all, just puts the 8R's the other side of the center line. - Jeff

## Possible Production Layout-b

(5-1R, & 6B added)
